

SMART ENERGY ANALYTICS CAMPAIGN: BECOME A SUPPORTING PARTNER

The Campaign provides resources to answer EMIS and monitoring-based commissioning questions

SIGN UP TO BRING EMIS TOOLS AND RESOURCES TO YOUR MEMBERSHIP AND CUSTOMER BASE

What is the Smart Energy Analytics Campaign?

The Smart Energy Analytics Campaign is a program sponsored by the U.S. Department of Energy to promote the increased adoption of EMIS (Energy Management and Information Systems) technologies by owners, facility managers, energy managers, and operators of commercial buildings

EMIS technologies enable improved energy performance in buildings by providing better access to energy and system data and applying analytics to the data

Campaign Goals

Encourage and track uptake and energy savings associated with use of EMIS and monitoring-based commissioning (MBCx)

Convene adopters of EMIS technologies to share successes in improving the performance of their facilities

Recognize best practices through awards for exemplary performance

Who can be a Supporting Partner?

Trade and industry organizations

Utility efficiency program administrators

EMIS and metering vendors

Energy efficiency service providers

To join as a supporting partner in the Smart Energy Analytics Campaign, visit <https://smart-energy-analytics.org>

What will your members and customers find when they enroll in the Smart Energy Analytics Campaign?

Participants in the campaign **pledge**:

- To install an EMIS or use an existing EMIS **to analyze data and make energy-saving improvements**
- To take action to **implement effective solutions and report on those improvements**

Participants receive technical assistance and recognition, with national awards given for exemplary performance

The Campaign is delivered in partnership with:

Role of Supporting Partners

Supporting Partners are organizations committed to promoting the benefits of the Smart Energy Analytics Campaign

Partners spread the Campaign's message to their customers or members, recruit participants and include a Campaign link on their website

Supporting Partners introduce customers and members to the latest information and research on successful EMIS practices and technologies

Benefits to Supporting Partners

Connect your company to a multi-year Campaign to Increase adoption of energy analytics

Leverage Campaign resources to support your program or business, including:

- EMIS Crash Course
- EMIS Specification & Procurement Support
- Regional Guide to EMIS Incentives

Assist your members and customers in achieving cost-effective energy savings, best practice EMIS and MBCx, and improved building performance
